Other comparisons to the past

Challenges

- War / Armed Conflict and potential impact on energy and other supply chains
- Fiscal positions of most governments
- De-coupling
- Sustainability Crisis
 - Climate
 - Biodiversity

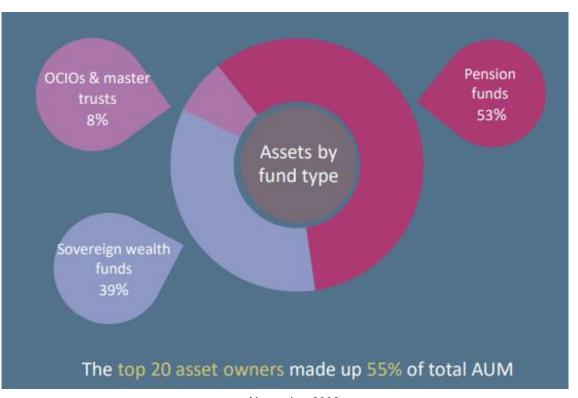

Opportunities

- Stronger Investment Governance
- Availability and speed of data transmission
- Wider and deeper range of accessible investment opportunities
- Tools around portfolio construction and analysis more developed
- Better renewable technologies

Who are the institutional investors?

November 2023

2024

Source: Thinking Ahead Institute

Some traditional models and approaches being used

Norway Model

- invests almost exclusively in publicly traded securities
- follows a diversified global fund strategy to perform well in different economic and market conditions with a low tracking error.
- rigorous asset allocation that allows little deviation from the policy portfolio, which is determined by the government based on long-term objectives and risk tolerance.
- a responsible and sustainable investor that considers the ESG factors of the companies, sectors, and economies it invests in. It also engages with its investees.

Endowment Model

- invests in a wide range of asset classes, including alternative or illiquid assets
- aims to achieve high returns with low volatility and low correlation with the market by exploiting the long-term horizon and the diversification benefits of these assets
- disciplined asset allocation that is determined by the strategic objectives and risk tolerance of the institution, and allows little deviation from the policy portfolio.
- a responsible and sustainable investor
- requires a large amount of capital, access to high-quality managers, and a long-term perspective.

Canada Model

- invests in a wide range of asset classes, including alternative or illiquid assets, such as infrastructure, real estate, private equity, and natural resources.
- similar to endowment model aims to achieve high returns / low volatility / low correlation / exploiting the long-term horizon
- has a large and skilled internal team that manages most of the assets in-house, reducing costs and increasing control.
- responsible and sustainable investor that considers the environmental, social, and governance (ESG) factors of the companies, sectors, and economies it invests in.
- may not be easy to replicate, as it requires a large amount of capital, access to high-quality deals, and a strong governance structure.

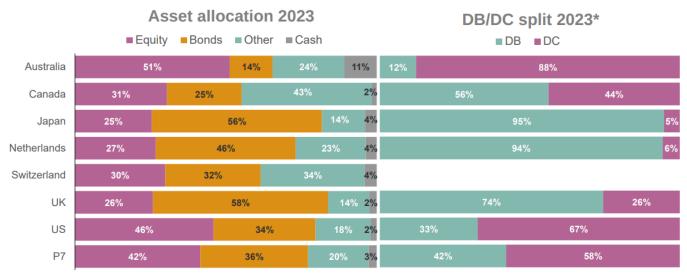

LDI Model

- focuses on matching the assets of a portfolio with the current and future liabilities of an investor. Goal is to generate enough cash flow to pay for the obligations.
- used by pension funds / insurance companies to reduce risk of not being able to meet liabilities due to market, interest rates or inflation.
- typically involves investing in fixed-income securities, that have similar duration and cash flow characteristics as the liabilities but may also use derivatives, such as swaps or options, to further adjust the risk and return profile of the portfolio.

Pension Funds – some high level data

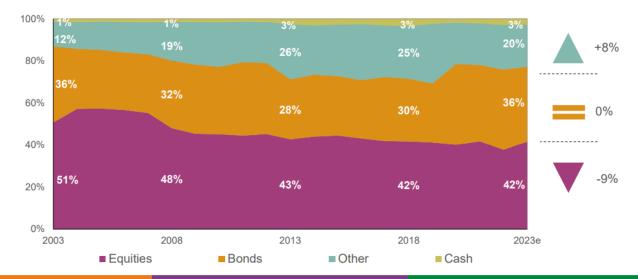

if irish funds

Asset allocation and DB/DC split

Numbers may not add up to 100% due to rounding

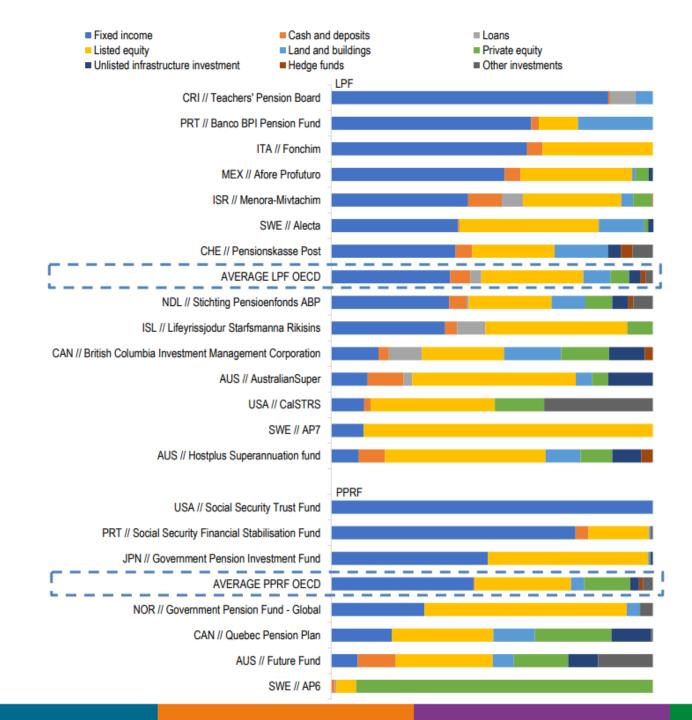

Aggregate P7 asset allocation from 2003 to 2023

Source: Thinking Ahead Institute

Pension Funds

- Data availability on Asset Allocation poor across wide range of countries
- Highest exposures to interest rates and equity market beta
- Significant cultural differences in how funds are invested linked to:
 - Market structure
 - Benefit Type
 - Sponsor

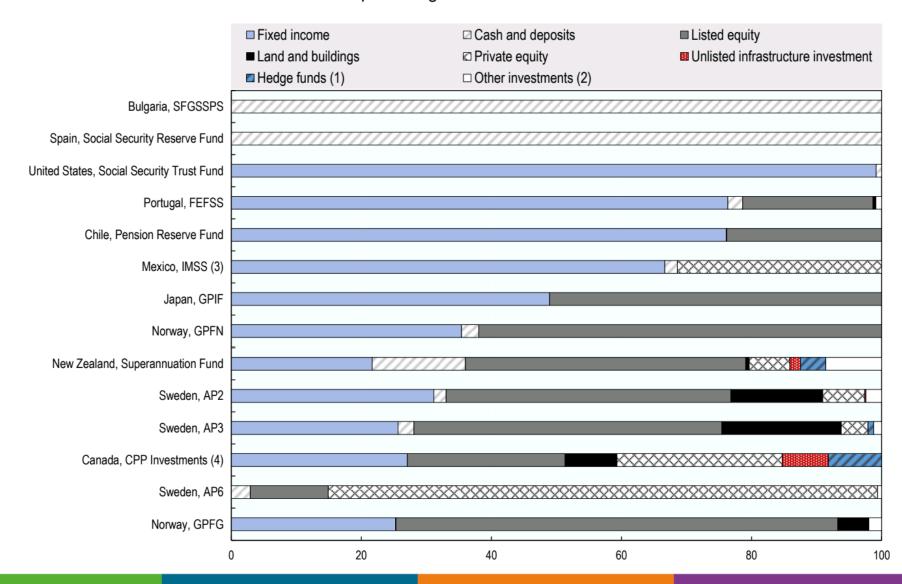

Public Pension Reserve Funds

firish funds

Pension Funds

 Not every DB plan will move to buyout – what does a "run-off" fund look like?

Defined Benefit

- Improved Funding Position
- De-risking / Buy-outs
- UK Gilts & Liquidity Focus

- Main focus is on cost
- Want wider asset access
- Seek Equity ß diversifiers
- Less focus on decumulation

Defined Contribution

90% of UK DC in growth phase strategies

Nest (UK) and the role of funds

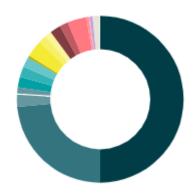

Background / Approach

- National Employment Savings Trust is a defined contribution workplace pensions scheme set up to facilitate auto-enrolment. It offers age-based options, static options or asset class options
- The options use a range of underlying funds

Government Pensions Investment Fund- GPIF (Japan)

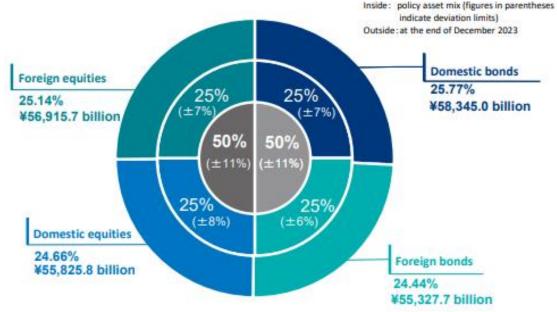

Background / Approach

Account

- Manages Japan's pension reserve fund.
- Goal is to contribute to the stability of the national pension scheme by securing investment returns with minimal risk and a long-term focus.
- Largest public fund investor in Japan and amongst largest globally.
- Modest allocations to alternatives
- Includes collaboration with Development Bank of Japan and Intl. Finance Corporation for emerging market PE.
- Proposing concept of "Public Market Equivalent" to measure PE fund's performance relative to the listed market.

Pension Reserves Managed by GPIF and the Pension Special Account - End of December 2023

	Market value (¥ billion)	Allocation of Pension Reserve (1)	Allocation of Pension Reserve (2)	
Domestic bonds	58,345.0	25.77%	50.21%	
Foreign bonds	55,327.7	24.44%	50.21%	
Domestic equities	55,825.8	24.66%	49.79%	
Foreign equities	56,915.7	25.14%		
Total	226,414.2	100.00%	100.00%	

The percentage of the alternative investments: 1.53% (within maximum 5% of total portfolio)

Pension Danmark

Background / Approach

- Multi-employer scheme
- Supplements public benefits
- Lifecycle products for various age cohorts
- No guaranteed minimum yields

* **Growth asset allocation includes** 100% of Australian shares, International shares, Private equity, Listed property, Listed infrastructure and Other assets. **Unlisted property, Unlisted infrastructure and Credit are classified as 50% growth and 50% defensive. Defensive allocation includes** 100% of Fixed interest and Cash.

National Pension Service - Korea

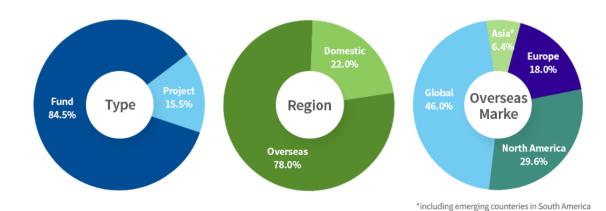

Private Equity Investments (6.6%)

Type/Geography Composition

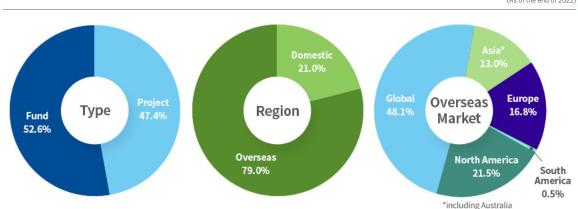

(As of the end of 2022)

Infrastructure Investments (4.0%)

Type/Geography Composition

(As of the end of 2022)

Insurance Funds

Starting Point

- Conservative investors
- Matching portfolios of assets and liabilities driven by regulatory requirements
- Heavy emphasis on government bonds
- "Surplus" portfolios typically conservative
- Holding lots of cash

Changing World

- Increase in yields makes things "simpler"
- Pressure on real estate investments
- Elevated market volatility & inflation causing them to look more widely.
- Investment grade bonds provide an attractive source of higher current income and return on a risk-adjusted basis.
- Regulatory change an important factor

Looking Ahead

- Private debt continues to be the most utilised asset class
- Emerging Trend is the use of evergreen funds
- Complexity of instrument and structure as well as concerns regarding liquidity persistent concerns.

Insurance Companies

How do you expect the asset allocation of your portfolio to change over the next 12 months?

	Increase	Decrease
Domestic equities	13%	15%
International equities	17%	10%
Emerging market equity	6%	6%
Core fixed income (government/corporate bonds)	37%	21%
High-yield/bank loans	12%	12%
Multi-asset credit	7%	1%
Investment-grade private debt	32%	1%
Sub-investment-grade private debt	21%	1%
Structured credit	12%	5%
Private equity	20%	6%
Real estate equity	18%	15%
Real estate debt	12%	6%
Infrastructure equity	20%	2%
Infrastructure debt	12%	2%
Hedge funds	4%	2%
Non-core fixed income	5%	1%
Cash	7%	27%

Endowments

Background / Approach

- Typically structured so that the principal invested is preserved in real terms while a portion of the returns is available for funding the organisation's ongoing cashflow requirements.
- Most hold the principal over the very long-term and many intend to do so in perpetuity.
- Can tolerate illiquidity and may not need immediate access to their capital invested.

Size of Endowment	U.S. Equities %	U.S. and Non-U.S, Fixed Income	Non-U.S. Equities	Global Equities %	Alternative Strategies*	Other %
Over \$1 Billion	8.80	9.54	9.26	6.80	62.61	2.99

Implications for funds and opportunities

- Will embedded practices, behaviours and beliefs give way to revised approaches?
 - Next chapter of financial investing is being written in new conditions
 - Some tailwinds from the EU Competitiveness agenda
- Changing needs of investors having a direct impact on
 - Exposures or risk premiums they want to access (direct/via funds)
 - Nature and terms of assets/vehicles they use
- Understanding the way different types of institutions put their portfolios together
 - critical in developing your strategy
 - communicating the investment opportunity
